The First

Trinity River Corridor Project Photo Contest

Discover Dallas adventure through the lens of your camera.

Plan a summer adventure in the heart of the city and meet the challenge of fellow photo aficionados. The Trinity River Corridor Project wants you! That's right. Here is an opportunity for professional, amateur and youth participants to enter photos capturing the natural beauty and wonder found along the Trinity River and within the 20 miles of the Trinity River Corridor Project.

Photographers can enter images from June 30 through September 30, 2009, in the following categories: wildlife, forest, river and architecture/structure. Along with the chance to win cash prizes, submitted works will be included in an exhibit at Dallas City Hall and on the Trinity River Corridor Project Web site. The City has partnered with the Dallas Camera Club, Competitive Cameras and Canon to host the contest.

What are you waiting for? Register now and also sign up for a FREE Photography Workshop to be held on July 16 and presented by Canon. The workshop will be held at the Trinity River Audubon Center.

For additional information on the contest and to view maps and locations to photograph visit: www.trinityrivercorridor.org.

About the Trinity River Corridor Project:

THE TRINITY

The projected \$2 billion Trinity River Corridor Project is the largest public works and urban development project in the history of Dallas, and one of the largest of its type in the nation. It will reduce flood damage, provide recreational amenities and add visionary environmental benefits, improve downtown traffic congestion, and encourage development along the Trinity River. The Trinity River Audubon Center opened November 2008 and the staff has already welcomed over 32,000 people to the center. The Lower Chain of Wetlands is complete and progress is underway on Moore Park Gateway Phase I and Trinity Trail Phase I. The Margaret Hunt Hill Bridge being built alongside the Continental Avenue Bridge and designed by internationally known architect Santiago Calatrava is now under construction with the first shipment of steel in Texas; and in 2011, construction will begin on the second Calatrava designed bridge, the Margaret McDermott Bridge. For project updates and to watch bridge construction progress, visit: www.trinityrivercorridor.org.
